Art Unit: 1631

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to nucleic acid databases and microchips, classified in class 536, subclass 23.
- II. Claims 4 and 5, drawn to methods for selecting a database, classified in class unknown, subclass unknown.
- III. Claims 6-8, drawn to a computer system, classified in class 702, subclass 20. (Claim 7 depends from itself.)
- IV. Claims 9-11, drawn to computer methods for managing information relating to hematopoietic analyses, classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons. The database and microchips of Group I have uses other than in the methods of Groups II and IV. For example, the nucleic acid databases and microchips of Group I may be used in affinity chromatography. The nucleic acid databases and microchips of Group I are materially different from, and are therefore independent and distinct from, the computer system of Group III. The methods of Groups II and IV may be practiced independently of one another. The methods of Group II may be practiced without the computer system of Group III. The computer system of Group III is not needed to practice the methods of Group IV.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

To search any two groups as outlined above would create an undue burden for the U.S. PTO because the searches of the non-patent literature are not only non-overlapping to any appreciable extent, but are also divergent in nature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

Art Unit: 1631

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (703) 308-0296. The fax phone number for Examiner Martinell's desktop workstation is (703) 746-5162. The examiner works a flexible schedule and can be reached by phone and voice mail. Alternatively, a request for a return telephone call may be e-mailed to james.martinell@uspto.gov. Since e-mail communications may not be secure, it is suggested that information in such requests be limited to name, phone number, and the best time to return the call.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached on (703) 305-4028. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
